## Model #: URM-15T

### Remote Control for iTunes

### Highlights

- iTunes is even better with a remote control
- Sleek 17-key remote
- 35 ft. Range

### Description

The Keyspan Remote for iTunes is a powerful infrared remote that allows you to control iTunes and other multimedia applications on your Mac or PC in the same convenient way that you now control your home TV.

#### How it Works...

The remote controls your multimedia applications by sending them the same keystrokes that you do when you control the application from a keyboard. For example, pressing the spacebar on the keyboard causes iTunes to play a track. The remote sends the same key to iTunes when you press the 'play' button on the remote -- allowing you to control iTunes from across the room.

#### System Requirements

##### Mac:

- An available USB port; Mac OS 8.6 (or later); Mac OS X 10.2.8 or greater

##### Windows:

- An available USB port; Windows 98/98SE/Me/2000/XP

##### Battery:

- Remote Control uses two CR2025 (Lithium 3V) batteries (included) Note: This remote is not compatible with AirPort Express. For AirPort Express compatibility, use our Express Remote.

#### Package Includes

- USB Receiver (UIA-11F Non-Airport)
- Remote Control (REM-17B)
- remote's Batteries (two CR2025 [Lithium 3V])
- CD with driver software and user guide
- Printed Quick Start Guide

### Features

- Controls iTunes even when in the background (requires Windows 2000/XP or Mac OS X)
- Sleek 17 button infrared remote transmits signals up to 40 feet
- Includes key maps for iTunes, MusicMatch, Windows Media Player, WinAMP, QuickTime, PowerPoint and other popular multi-media applications. Simple control panel allows you to program the remote for use with additional applications
